PRODUCT OVERVIEW GLASS-BOTTLE

Private Beverage

INDUSTRY • DRINK DEVELOPMENT • PRODUCTION

Lately, market share of private label drinks has been growing faster than ever. Private label brands have been more and more popular among retail stores, distributors and entrepreneurs. Our team, with 20 years of experience, can cater to your various needs regarding pricing, quality and variety. We can create any beverage you can think of. We work with more than 100 brand owners from Turkey, Europe and Asia. Our team of food engineers can help create unique beverage formulas for you. We can provide a brand gamut of products or create a standard beverage with your brand and design on it.

WE PRODUCE AND FILL THE FOLLOWING TYPES OF BEVERAGES

FUNCTIONAL DRINKS

We are experienced in the development and production of functional beverages, including beverages that boost immunity, manage body mass, help with mental focus and relaxation, and also sports drinks. We can provide a wide array of sport and nutritious drinks, create packaging and labling solutions, and help you reach out to various consumer profiles.

ALCOHOL DRINKS

When it comes to private label alcoholic beverages, it is all about the instructions coming from the customer. Our company has collaborated with many others to create many popular alcoholic beverages including beer, vodka, raki, wine, gin, rum and alco-pop.

ENERGY DRINK

Whether you need a standard energy drink or a completely unique one, we can provide you with our ideas about packing design, taste and other characteristics. If you have your own ideas, we can creatively refine them. We helped create more than 100 energy drink brands from beginning to end. With our experience in energy drink production and supply chain, we act not like a mere supplier, but like a partner at every stage.

NATURAL WATER

Private label water has been increasingly common in Europe, Middle East and Asia. It is especially popular with retailers, distributors and brand owners. Private label water is also a perfect solution for brand marketing. With a wide selection of mineral content, we can design the brand and package of your water and also bottle it for you at one of our springs.

SOFT DRINKS

It is up to you to choose from our wide array of beverages, including coke, orange juice, soda, ice tea, tonic, sports drinks, and aromatized carbonated or non-carbonated beverages. You can pick one of our standard products, or we can develop unique tastes and formulas, and also come up with packing solutions that include plastic bottles, aluminum cans, glass bottles and tetra aseptic boxes. It is all up to your needs and imagination. We will find the best solution for any beverage need.

FRUIT JUICE

Fruit juices have been the primary beverage for centuries. We can create fruit nectars, pulpy drinks and 100% fruit juices in any kind of packing.
